ARIES

Eco products

*for the
household*

Dear Customers,

There are problems which can be prevented.

This is true for humans and animals alike.

For example, when moths and mosquitoes come across a smell they don't like, they fly somewhere else.

When we constantly deny cockroaches, mites, fleas or nits somewhere to hide, they will go more to their liking.

But when pests have found their way into the home they need to be treated as soon as possible - with natural products which do not harm our own health.

Klaus-Dieter Szczesny

Director - ARIES Environmental Products

BIOLOGICAL INSECT PROTECTION

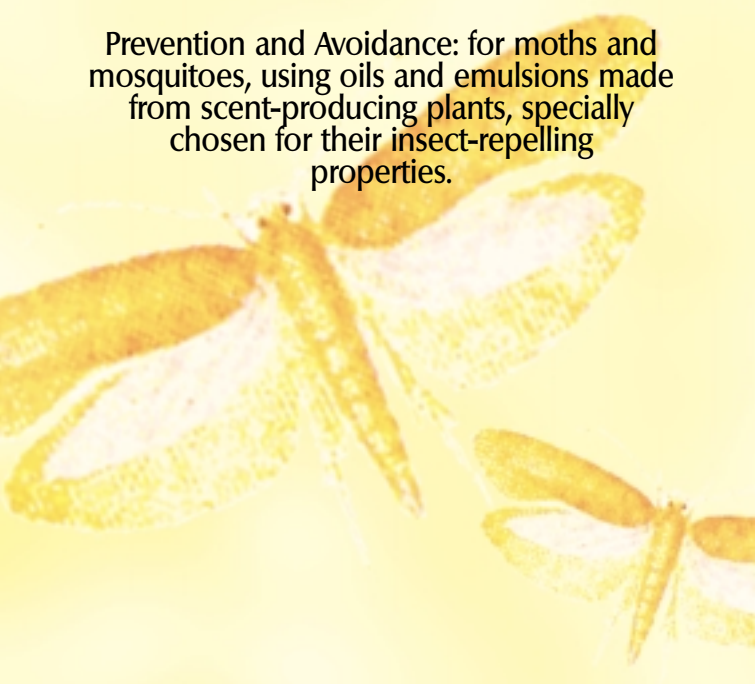

Insect Protection Which is Gentle on the Health

ARIES offers a range of effective insect treatments which work completely naturally. You can treat insect problems in the home in one of three ways:

Capture and Identification: for moths and cockroaches using adhesive traps which are treated with specialised baits.

Treatment: for all kinds of pests. Natural, biodegradable insecticides whose active ingredients are specially aimed at individual creatures; e.g. to treat food moths, specially bred grubs are used which disrupt the moths reproductive cycle, acting as natural predators.

Prevention and Avoidance: for moths and mosquitoes, using oils and emulsions made from scent-producing plants, specially chosen for their insect-repelling properties.

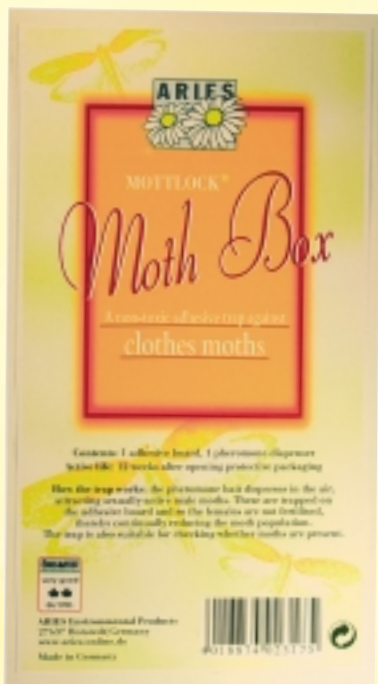

MOTTLOCK®

3 Adhesive Traps for Food Moths

- **non-toxic treatment for food moths**
- **better results with pheromone bait**
- **monitoring system for kitchen and pantry**

These non-toxic adhesive traps are ready for use as soon as the protective film is removed. The pheromone bait (sexual scent of the femal moths) attracts the males. They are then trapped on the sticky surface of the strip and the moth population is constanly reduced. Effective for approx. 8 weeks.

MOTTLOCK®

Moth Box

A non-toxic adhesive trap against clothes mothes

Contens: 1 adhesive board, 1 pheromone dispenser

Active life: 12 weeks after opening protective packaging

How the traps work:

the pheromone bait disperses in the air, attracting sexually-active male moths.

These are trapped on the adhesive board and so the females are not fertilised, thereby continually reducing the moth population.

The trap is also suitable for checking whether moths are present.

Bambule® *Moth Oil*

The natural Repellent
**Feeds wooden surfaces and
protects against moths**

Bambule® Moth Oil is a ready-to-use emulsion made from the etheric oil of the cembra pine and wax from the Brazilian carnauba palm tree.

Its smell repels moths.

All interior wooden surfaces such as shelves, cupboards, drawers and boxes are suitable for treatment.

Content: 250 ml

Cembra *Pine Oil*

Protection against moths

Etheric oils repel insects. Cembra pine oil releases its scent over a long period of time and helps prevent moths becoming established. It works as a repellent and is most effective preventatively.

Content: 50 ml

Pistal

The Natural Insecticide **Against pests and parasites**

Pistal is a tested natural insecticide against insects such as beetles, fleas, cockroaches, wood boring creatures, mosquitoes, flies and moths as well as their eggs, nits and larvae.

Biocides like Pistal are, by their very nature, toxic - otherwise they would not be effective. However, Pistal's natural ingredients biodegrade very quickly and repeated treatments are therefore possible without toxic build-up.

Content: 250 ml

Bambule®

Insect Spray

Against pests and parasites

With neem and tea tree oil

Bambule® Insect Spray is a completely natural insect spray for use against all creeping and flying insects such as cockroaches, mosquitoes, flies, moths and beetles as well as their eggs, nits and larvae.

Neem tree oil, which is completely harmless to humans, affects the insects by making them stop eating, thereby hindering their growth and proliferation.

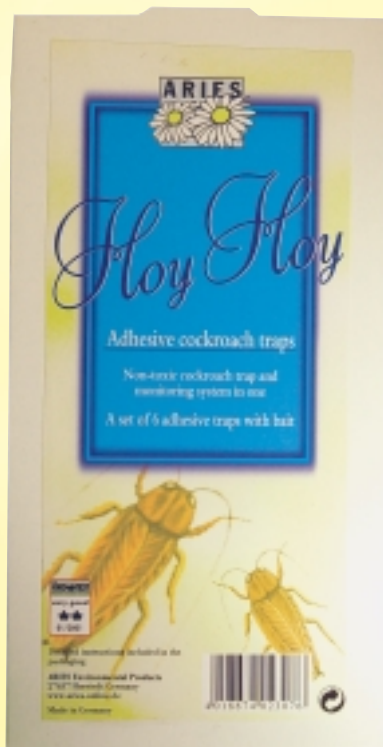

Content: 250 ml

Hoy Hoy

Adhesive cockroach traps

- Non-toxic cockroach trap and monitoring system in one
- A set of 6 adhesive traps with bait
- Detailed instructions in the packaging

Anti Ant

Natural powder

Against ants and all creeping insects

Content: 50 ml

Lavender Oil

Protection against moths
Organically produced

Lavender oil can be used in the kitchen and bedroom as a pleasantly scented protection against moths. Treat natural wood surfaces with lavender oil and you will protect your clothes against moths for weeks.

Content: 50 ml

Citronella Oil

Protection against mosquitoes
Pure etheric citronella oil

Natural protection against mosquitoes. Repels midges and other biting insects. Etheric oils have long been used as natural protection against stinging and biting insects. Citronella is one of the oldest insect repellents.

Content: 50 ml

Bambule®
Hygiene Spray
The Natural Disinfectant

**Against bacteria, germs
and viruses**

Bambule® Hygiene Spray is a natural product made from etheric oils and alcohol.

It is effective against bacteria, spores, fungi, many viruses and causes of illness.

In the kitchen or bathroom, where pets spend time, or where hygiene problems may occur, you can rely on the spray to treat both rooms and surfaces. This product is laboratory tested and biodegradable.

Content: 250 ml

Bambule®
Mite Spray

Natural Textile Protection

**Protects against dust
mites with neem oil**

One in three people today suffers from an allergy.

Allergies to dust mites are particularly prevalent.

The neem extract, obtained from the leaves and seeds of the Indian neem tree, is effective protection against these mites while being harmless to humans.

Protects mattresses, blankets, carpets and other fabrics in living areas.

Content: 250 ml
